CLUB DEVELOPMENT COMMITTEE

This year the President of the Association and I visited and spoke with the members of both the Hampton and Sackville Gun Clubs.

In the month of July Tony Wood and myself, travelled to CFB Gagetown to speak with the Cadet Marksmanship Course. Tony Wood gave a complete explanation and rundown on the air gun shooting, the competitions, and the functioning of the clubs, as well as the comradery that comes with being part of such a great sport. The presentation went over so well, that the RNBRA was again requested to return in August to do another presentation. On this presentation, I asked Don Brown and Steve Smith to join me, along with some of the members of the Air Gun Section. We all proceeded to CFB Gagetown where the Cadets were having a qualification shoot on the electronic targets. Our group took part in the shoot by conducting background activity. Two young ladies who were with us, distinguished themselves in their explanation of how the air guns worked and what the function was of their Clubs. I sincerely believe that this may become an ongoing detail with the Cadets.

On the Range Officer side of the Association, I have conducted two (2) Range Safety Officer Courses. The first course of students consisted of personnel from the Spring Hill Gun Club, Fredericton and the RNBRA. The second course was mainly RNBRA personnel, students from Saint Antoine and Bouctouche. The Buckskinners will be asking for a course in the near future.

There have been a total of twenty five (25), students qualified to-date.
